Subject: Marlee Float - WVDOH Approval

Dear Mr. Mc Cutchen,

The West Virginia Division of Highways, Materials Control, Soils and Testing Division has evaluated your submittal for the **Marlee Float skimmer** per Materials Procedure MP106.00.02 and the product has been **approved** for use on WVDOH projects under Specifications 107.21.2 – Pollution, and 642 – Temporary Pollution Control, where applicable for use, or when skimmers are specified in project plans. It is also accepted for use in WVDOH maintenance applications where applicable. Please note that at this time the product cannot be placed on a WVDOH approved list as one for this type of item does not currently exist. Classifying a product as “approved” does not obligate the Division in any way to use or specify the product.

This approval covers all three models as provided in your submitted HL-468 form. Please feel free to use this Materials Division approval for your promotional needs.

This e-mail is also to be used as proof for contractors and WVDOH project personnel of West Virginia Division of Highways acceptance, if needed.

Thank you for your submittal. If you have any questions, the easiest way to contact me is by e-mail as I am frequently not in the office.

Sincerely,

Greg Bradford
